Second Term English Test.

I/Reading Comprehension:

Read the text carefully then do the activities.

This report presents detailed results of a survey about road accidents in Algeria. These days there is much talk about the horrible increase of road accidents in Algeria for many reasons as such **I** decided to do a survey to know the main factors behind this spread of accidents

For this purpose, I questioned a group of 50 drivers aged between "35-60" and have long experiences with driving. I asked **them** whether they experienced road accidents or not. Most drivers claimed that they had experienced or seen accidents along their ways. Since my intention is to know the causes, I questioned them why is such increase in these road accidnets.10 of the informants said that it was because of climate changes, 18 of them said it was either drunk driving or deconcentrated driving yet, 80 percent of them said that speed i.e. fast driving was **the main reason**behind the spread of road accidents. More than this, drivers claimed that the ignorance of road regulations and the absence of strict punishment legislations are other motives in this quest.

The survey confirmed our hypothesis about the spread of road accidents in Algeria that speed is the most important factors behind such terrible spread and death cases.

1. ***Circle the right answer.(1pt)***

The text is:

a) a report **b)** a questionnaire **c)** a survey

2. ***Are the following statements true or false? (2pt)***

a. The report is about presenting information of road accidents.....
