Introduction

In preparation for the 2019-2018 academic year, and in order to ensure the quality of education and to improve educational pedagogic performance, and to continue with the reforms it has initiated, the General Inspectorate of Pedagogy is putting the pedagogy in the hands of educational practitioners as complementary tools for the reference documents adopted and implemented in the field at the stage In order to facilitate the reading, understanding and implementation of the curriculum and to standardize the content of the content in the context of the guidance provided by the curriculum, which is explained in the accompanying documents. These gradations allow methodically to harmonize it with the pedagogic assessment plan and the continuous monitoring scheme. In order to reflect this, we ask everyone to read and understand the principle of these gradients in order to put it into effect. The inspectors are constantly involved to accompany the teachers, especially the new ones, to modify or adapt the activities. Applied according to the availability of laboratory equipment for the technology or the mass media to simulate it - appropriate, as required by the efficiency observed, provided that it is approved by the National Education Inspector of the discipline.

Methodological note

However, the field practices on the one hand, and the adoption by the Ministry for a period of annual distributions of courses obliges professors to respect the time of their implementation, and the task of supervising and follow-up bodies to assess the percentage of completion of the curriculum and the accompanying documents. We have decided to submit the solutions to supplement them cumulatively, which led us to re-put the issue urgently to provide the alternative, because the difference between the implementation of the curriculum and the gradual implementation. The first is based on a restricted automatic distribution according to time scales with pure linear programming, in which handling is in sequence and in all the particles and rationales due to the serious preparation of the learners for the tests resulting in negative practices such as typing, filling, preservation and retrieval without analysis or analysis. , While the second, the annual course for the construction of learning, focuses on how the curriculum is implemented with respect to the pace of learning and the learner's abilities and independence, and to consider efficiency as a systematic principle of the curriculum. This efficiency is a starting point and point of access for any educational work. Knowledge is a resource that serves efficiency within the structured concept network of the discipline.
