DECEMBER:2024	Level: 3ASL	Duration : 2h

FIRST TERM ENGLISH EXAM

Read the text carefully then do the following activities
A/Comprehension (7pts)

Muslim Arabs all along have absorbed cultures from different territories they took over, like the Roman Empire and Persian Empire. It would be good to mention that this civilization achieved many goals during their existence mainly in astronomy and mathematics. The Empire lasted from about 750 to 1258.

The Arabs expanded in the seventh and eighth centuries having as their centre Damascus. Soon later came the Abbasid dynasty ruled by Abu al-Abbas. In 762, the establishment of the capital city was relocated to Baghdad. The new capital was better located for transportation purposes and also for commerce.

Since Arabs conquered many of the rich provinces from the old Roman Empire they **themselves** were also becoming very wealthy with Baghdad as the trade centre for the Middle East and Europe. Unfortunately there was at some point an awful fight between two brothers for the succession to the caliphate. **This** obviously hurt the Abbasids because **they** had lost their sovereignty. Many monuments and properties had been ruined as well.

The Islamic civilization was the one that introduced algebra in mathematics and perfected the astrolabe. They discovered new concepts in chemistry and also developed medicine.
