First Term English Exam

Part one : Reading

Read the text carefully, then do the following activities:

Throughout the history, many intellectuals dealt with corruption or theorized about it one way or another. Machiavelli had a low opinion on republics, considering them even more corrupt than other regimes, and according to **him**, corruption leads to moral degradation, bad education and bad faith. On the other hand, however, the great philosopher and lawyer Sir Francis Bacon was known both for receiving bribes and taking them. When **he** reached the highest judicial position in England, he was caught in as many as 28 cases of accepting bribe and defended himself before the parliament. The parliament sent him to the jail where he spent only a few days as he was able to bribe the judge.

Thus, although corruption has been occurring in society ever since, it has only been given more attention in the recent period—the researches on the phenomenon and its negative impacts have become more common after 1995. The attitude of the public toward corruption was, until **then**, neutral.

In 1998, Kaufmann and Gray found that: Bribery is widespread, especially in the developing and transition countries. Bribery increases transaction costs. It usually leads to ineffective economic results, in the long term impedes foreign and domestic investments. This pushes companies into the "underground" (outside the formal sector), weakens the state's ability to increase revenue. So, it cannot provide enough public goods.
