The Third English Exam.

Text:

The Taj Mahal is one of the most famous mausoleums in the world. It is located on the banks of River Yamuna at Agra, India. It was built by Emperor Shah Jahan in 1631 in memory of his wife Mumtaz Mahal who died when giving birth to her fourteenth child in 1630. He ordered Ustad Ahmad Lahaur to design a sort of temple for her. It took more than twenty years to complete this splendid edifice.

The name "Taj Mahal" means crown palace. It was built by more than 20,000 workers and over 1,000 elephants were used to help with the transport of the heavy material during the construction. The main attractive feature is the central dome which is surrounded by four smaller domes and four minarets at each corner. It is made of white marble which color changes with the time of the day and whether or not there's moon at night. Taj Mahal was decorated with jewels, gold and silver and some Ayates from the Quran were written on many of its walls.

This beautiful temple is surrounded by outstanding gardens and fountains. Its height is 73 meters. It is considered as one of the Seven Wonders of the World. It was declared as a UNESCO World Heritage in 1983 for being "the jewel of Muslim art in India and one of the universally admired masterpieces of world's heritage".

Many tourists come to see this beautiful structure from different parts of the world. Some people think it is the best building on earth.
