The First Term English Language Test 2025-2026

November 17th

The Statue of Liberty _____

The Statue of Liberty is one of the most important and recognizable landmarks in the United States and the entire world. Located on Liberty Island in New York Harbor, it welcomes millions of visitors every year. The statue was a gift from France to the United States in 1886 to celebrate friendship and the shared values of freedom.

The statue was designed by Frédéric Auguste Bartholdi, a French artist.

It is a large woman holding a torch. The torch is a symbol of hope.

She also carries a tablet. On the tablet, the date of American

independence is written July 4, 1776. Her crown has seven rays.

At her feet are broken chains. They show that people are free

and no longer in slavery or oppression.

The statue is made of copper. It is very high, about 93 meters from the ground to the top of the torch. Over many years, the copper turned green because of the air and rain. Visitors can climb stairs to the crown. From there, they can see the whole city.

Today, the Statue of Liberty is more than a statue. It is a symbol of freedom, equality, hope, and new beginnings. People from all over the world know it. It inspires visitors to believe in a better future and remember the importance of liberty.
